FOAM EQUIPMENT

ADVANTAGES OF FOAM

- Increases dwell time
- Visual marker for operator
- Reduces water and chemical usage
- Reduces labour costs

MARKETS SERVED

- Institutional
- Industrial
- Food & Beverage
- Transportation
- Automotive

PUMP UP FOAM UNIT

The 900-2PU pump-up foamer technology provides innovative spot cleaning and sanitation solutions for the industrial and institutional markets. Patented dual tube technology draws the chemical and air from the tank into separate tubes creating thick foam when mixed at the trigger operated foam wand. Flow in the air tube is controlled by a needle valve giving an operator the ability to control foam consistency.

PORTABLE FOAM UNIT

The 925 is a 25 gallon portable foamer that offers innovative new features and ergonomics for industrial and institutional foam cleaning. This unit's four wheel design allows for a wide range of mobility and the convenient drain feature allows for easy emptying. Model 95050 gallon reservoir available.

PORTABLE BATTERY FOAM UNIT

The Portable Battery Foam Unit holds 10 gallons of ready to use product. The 12V sealed lead acid battery powers the on board air compressor which drives an air diaphragm pump. The pump is available in Santoprene, Viton or Kal Rez to meet the most demanding chemical handling requirements.

This unit can run up to 60 minutes on one charge while producing 6 gallons of foam per minute. This is the most portable compressed air foamer available and can be used in a number of areas where compressed air is not available.

SMART. SAFE. GREEN
A NEW WAY TO CLEAN
